PROFILE

Data analyst with 4+ years of experience building end-to-end analytical ecosystems, designing predictive models, ML workflows and interactive data visualization driving business strategy. Skilled in data analysis leveraging LLM, designing data pipelines cloud environments and optimizing queries to deliver scalable solutions and automation.

PROFESSIONAL EXPERIENCE

AGR Knowledge Services Pvt Ltd. | Mumbai, India

Dec 2021 - June 2024

Senior Analyst (Business Intelligence)

- Developed classification and segmentation models to analyze user behavior and uncover product adoption gaps, enabling a retail client to address requirement gaps and achieve a 6% increase in market share
- Led an end-to-end project developing ETL flow and data pipelines integrating marketing and omnichannel sales data, with ML-driven funnel, channel and user analysis contributing 15% lift in marketing ROI for a retail client
- Served as SME for two clients, streamlining their enterprise data extraction, transformation and reporting processes, resolving complex issues, and optimizing data models to support data-driven strategic planning and decision-making

Analyst (Market Research)

- Automated data cleanup using Python, performed statistical analysis and forecasting showcasing historical trends and market size estimates providing demand planning recommendations
- Designed a reusable analytics framework leveraging SQL, Python, and Tableau for process optimization and automation of brand health and equity dashboards, reducing analysis turnaround by 40% and ensuring consistent delivery across 7+ clients
- Performed market deep-dive studies integrating model-based predictions and segmentation to identify new product lines, pricing strategies, and supply-chain opportunities, driving 10%+ market share growth for an e-commerce client

WhiteHat Education Technology Pvt Ltd. | Mumbai, India

June 2020 - Dec 2021

Coding Instructor

- Delivered over 800 python coding classes to students aged 8 to 11, achieving trial class conversion rate above 21%

Mumbai Railway Vikas Corporation Ltd. (MRVC) | Mumbai, India

Feb 2016 - Aug 2018

Business Analyst

- Led requirement gathering sessions with stakeholders to define business objectives, identify key data sources, and establish success metrics, ensuring alignment of data analytics initiatives with client goals
- Collaborated with product managers to define scope, prioritize requirements, and translate them into JIRA user stories, enhancing agile sprint efficiency and accelerating feature rollout

TECHNICAL SKILLS

Programming & Data Science: Python, Pandas, NumPy, Matplotlib, Scikit-Learn, Statistical Modeling, Feature Engineering, Root Cause Analysis, EDA, Regression, Classification, Clustering, PCA, Time-Series, TensorFlow, PyTorch, Keras

Visualization, Apps & Front-end (UI): Tableau, Power BI, Excel, Git, GitHub, Streamlit, React

Databases and Cloud storage : MySQL, PostgreSQL, MongoDB, T-SQL, Hive, PySpark, Hadoop, Azure, AWS S3, Glue, Athena

Academic Projects

AI-driven conversational resume: A full-stack RAG chatbot (FastAPI, FAISS + MiniLM) with OpenAI gpt-4o-mini

Social listening system: End-to-end pipeline on tweets using AWS S3/Glue/Athena; delivers sentiment analysis (twitter-roberta-base-sentiment), Aspect based sentiment analysis (bart-large-mnli), theme based clusters via BERTopic (e5-base-v2) with GPT-4o-mini, and executive summaries - delivering interactive summary report for stakeholders

Customer Intelligence & Reorder Prediction System: A LightGBM reorder prediction model (ROC-AUC $\approx$ 0.84) to make next basket suggestions. Segmented customer, applied Association Rules, and built a Word2Vec recommendation engine

EDUCATION

Pace University | MS in Data Science | GPA: 3.9 (Machine Learning, Artificial Intelligence, Algorithm for DS)

Dec 2025

Mumbai University | Master of Management Studies (MBA) in Marketing | CGPA: 8.9

May 2020

Mumbai University | Bachelor of Engineering in Computer Science | CGPA: 6.6

June 2015
