Data Analytics professional with 5+ years of experience in product, growth and marketing analytics specializing in customer journey analysis, digital product analytics and BI development. Experienced in translating complex business problems into data-driven insights, ETL pipelines and automated reporting solutions that optimize customer experience and drive product roadmap decisions. Hands-on expertise in SQL, Python, and Tableau with strong cross-functional collaboration across Product, Engineering and Marketing teams.

EDUCATION

Pace University MS in Data Science GPA: 3.9 (Machine Learning, Artificial Intelligence, Algorithms for DS)	Dec 2025
Mumbai University Master of Management Studies (MMS) in Marketing CGPA: 8.9	May 2020
Mumbai University Bachelor of Engineering in Computer Science CGPA: 6.6	June 2015

TECHNICAL SKILLS

Databases	MySQL, PostgreSQL, T-SQL, Data Warehousing, AWS (S3, Glue, Athena)
Analytics and Visualization	MS Excel, Tableau, PowerBI, Looker/Google Data Studio, Omniture/Adobe Analytics
Python	Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Statsmodels
Hypothesis Testing	Chi-square test, ANOVA, T-tests, A/B testing
Marketing/Product Tools	Google Analytics, Meta Business Manager, Sprout Social, Amplitude, Mixpanel, Heap
AI/LLM	LLMs, OpenAI API, NLP, Sentiment Analysis, RAG, Prompt Engineering, AI workflow automation

PROFESSIONAL EXPERIENCE

Filmy AI | Product Analyst **New York, NY | Jan 2026 – Current**

Stack: SQL(PostgreSQL), Python, Tableau, Google Analytics, AI/LLM

- Built an AI-intelligent workflow for competitive benchmarking automating data collection, summarization and gap analysis across 5+ platforms reducing manual efforts, improving accuracy and delivering structured insights supporting strategic decision-making
- Conducted end-to-end user journey analysis for a two-sided talent marketplace, mapping engagement metrics and potential drop-offs to deliver data-driven recommendations optimizing onboarding flows and driving user engagement ahead of launch
- Collaborated cross-functionally with business and engineering teams to define data collection requirements, KPIs and measurement standards, developing a scalable AI-enabled analytics and reporting workflow for a two-sided talent marketplace

AGR Knowledge Services Pvt Ltd. | Senior Data Analyst

Mumbai, India | Dec 2021 - June 2024

Stack: SQL(PostgreSQL), Python, Tableau

- Conducted behavior analysis including end-to-end customer journey and segmentation analysis, identifying drop-off points that influenced product, marketing strategy and experimentation, resulting in increasing conversion rate by 15% and AOV by 6%
- Led customer lifecycle analysis (acquisition, conversion and retention) for an e-commerce client, supported A/B test execution and validated strategic recommendations, driving a 6% increase in repeat purchase rate and improved LTV:CAC ratio
- Built reusable SQL and Python ETL pipelines for funnel, cohort, churn and retention analysis across 3 e-commerce client accounts, scaling analytical capacities and reducing analysis turnaround time by 40%
- Designed and implemented data models and ETL pipelines integrating 5+ data sources including Customer, marketing, transactional, digital and VoC data, standardizing data definitions and enabling consistent, accurate reporting and KPI tracking
- Partnered with data engineers for experiment design, statistical validation and result summarization for A/B and multivariate tests, directly enabling Product and GTM teams to make data-backed decisions on growth initiative and feature launches
- Identified and resolved data quality issues across analytical pipelines, diagnosing root causes including ETL failures and metric inconsistencies, implementing validation frameworks and ensuring data integrity across reporting outputs
- Partnered with Product, Engineering, and Marketing teams to define product/feature success metrics, measurement frameworks and support experimentation providing end-to-end support from analysis to driving data backed impact

WhiteHat Education Technology Pvt Ltd. | Coding Instructor

Mumbai, India | June 2020 - Dec 2021

- Delivered 800+ Python coding sessions showcasing problem decomposition, algorithmic thinking, and technical communication

Mumbai Railway Vikas Corporation Ltd. (MRVC) | Data Analyst

Mumbai, India | Feb 2016 - Aug 2018

- Partnered with stakeholders to define data scope, identifying key data sources and establish KPIs, building Tableau dashboards tracking KPIs across product, revenue and operational metrics, delivering executive-ready reporting across 5+ business units

ACADEMIC PROJECTS - <https://github.com/SayaliSawant0101>

Social listening system: Built end-to-end data pipeline and analytics platform processing unstructured social media data, implementing sentiment analysis, theme analysis and automated executive-ready insights (<https://socialmedialistener.netlify.app/>) (Stack: AWS S3/Glue/Athena, twitter-roberta-base-sentiment, bart-large-mnli, BERTopic, OpenAI gpt-4o-mini)

AI-driven conversational resume: Designed and built an AI-driven conversational resume as a product experience, enabling recruiters to explore candidate details through an interactive resume that enhances engagement and simplifies information discovery (<https://resumechatbot.netlify.app/>) (Stack: FastAPI, FAISS+MiniLM, OpenAI gpt-4o-mini)
